

WB-Wafer Butterfly Valve

Features:

- . Pinless design for better operation without components loose and leakage during operation.
- . EPDM/NBR rubber on valve body ensures fully corrosion resistance.
- . Special notch plate provides long term services and corrosion resistance.
- . Body is coated with epoxy resin for corrosion resistance to maximize service life.
- . Butterfly valves standard with a hard back seat. No movement of the seat which results in a constant torque, and:
 - Dimensionally stable seat sealing surface
 - Minimal seat wear, extending seat life
 - Blow-out proof seat
 - Easily field replaceable
 - One-piece phonetic backing seat has integral O-ring seal for upper and lower valve shafts. Work with disc edge hub to provide a double stem seal.
- . Top flange meets ISO 5211.
- . Rigid design steel lever and with stainless steel pin and spring parts provides much better corrosion resistance and long service life.
- . Bi-directional tight shut off closure.
- . PTFE bushings on the upper shaft ensure stronger positioning function during operation.
- . Meets ISO 5752/DIN 3202/EN 593/BS 5155/API609

Service Fields:

General water supply, HVAC, water treatment, fire fighting, chemical system, and industry, etc.

WB is a resilient seated butterfly valve, with an EPDM/NBR rubber seat on valve body. The rubber sealing provides both sides bubble tight shut off and the pinless design provides stronger and fixed connections between shaft and disc that ensure the stem stays firm during operation.
